

Open in Niagara

www.openinniagara.ca

The Region of Niagara has launched the “**Open in Niagara**” mapping tool highlighting all businesses that are still open for business. This website is a free tool they have created that's designed to crowdsource information and to let residents know what essential businesses are open including those selling agriculture products(*Note: The tool is not compatible with Internet Explorer unfortunately).

Any business that wants to participate will be able to simply go to the site and click on the “Add a Business” button in the upper right hand corner. It will then ask you to complete a web form with your information and then all you have to do is click ‘save’. If you have any questions, please email info@niagaracanada.com

The Niagara Federation of Agriculture would like to thank the Region of Niagara for supplying this venue for advertising our agri-food businesses in this time of confusion.
